Readers' Corner

The Service Canada and Human Resources and Social Development Canada Library offers a list of selected recent publications, with short abstracts, on current and emerging workplace topics.

The Knowledge Economy

Many observers are describing a worldwide shift towards a "knowledge economy", a term often used interchangeably with "information society". Due to the abstract and often ephemeral nature of information and knowledge, rules and practices that succeeded in industry need to be adapted to ensure continuity and competitive advantage in a globalized economy. Resources such as expertise, experience, innovation, and education are becoming of critical importance, particularly when in combination with globalization and high-performance information technology; these are also being recognized as resources with a high value of return for those who are committed to investing and instilling loyalty in a new generation of knowledge workers. It is widely agreed that the effective exploitation of all forms of knowledge and information will become the key driver in wealth creation and the backbone of global economies.

See [Readers' Corner](#) for reading material on knowledge economy. Other references on the subject, in French only, are available on the French Web site.
